

SmartLink CardSlides

SmartLink CardSlides Accept SmartCards, Mag Stripe Cards, Credit, and Debit Cards – Readers Connect to the Internet Using Wireless Technology

A SmartLink reader will accept a SmartCard. Therefore, it can provide stand-alone payment acceptance with no need for an on-site, or off-site database to approve vend starts because all the information is on a SmartCard.

However, the real versatility of the SmartLink CardSlide is that it will also read a Magnetic Stripe card. This allows it to accept loyalty cards, credit cards, or debit cards. Every SmartLink CardSlide in the laundry is connected to the Internet through reliable wireless technology provided in the ESD communication package. The operator of the equipment is responsible for securing Internet service through an Internet Service Provider (ISP). In some locations where the Internet is not readily available, an air card can be used.

ESD's MyLaundryLink website makes it possible for an operator to monitor and interact with each machine in the laundry. This not only presents real-time accountability of all revenue, but it also permits control over the readers' programming, all from a remote computer or mobile device.

SmartLink - 11-016-XXX

SerialLink - 11-016-XXX

SmartLink CardSlide Benefits:

- ✓ **Durable Construction**
- ✓ **Easy Installation – No Hard Wiring**
- ✓ **Can Be Independent SmartCard or Wireless Mag Stripe Operation**
